

What is the NAMI Basics Education Program?

NAMI Basics is a free, six-session program designed for parents and other family caregivers of children, adolescents, and young adults (age 22 and younger) with emotional and behavioral difficulties. NAMI Basics helps parents and other family caregivers of children to understand the illnesses that are causing those behavioral difficulties, and the critical role families play in the treatment of those illnesses. The program is led by trained teachers who are also the parents or family caregivers of individuals who experienced emotional or behavioral difficulties prior to age 13.

NAMI Jacksonville, the local organization of the National Alliance on Mental Illness, offers NAMI Basics On Demand Education Program through NAMI's online program. www.namijax.org/basics-on-demand

The OnDemand program is self-paced and available 24/7. OnDemand offers the flexibility of participating in the course on *your* schedule.

Participant Perspectives

"This is such a great step by step program that walks parents every step of the way. It is as if you are holding their hand through it all."

"The course is inclusive of almost all aspects of family and child resources. I could have spent a lifetime getting all this information on my own. I feel supported, strong and ready to go forward."

"NAMI Basics bridges the gap. It provides help that can't be found in a doctor's office."
